DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 30-40 are rejected under 35 U.S.C. § 102(e) as being anticipated by Richardson et al, U.S. Patent No. 5,459,458 (hereinafter Richardson).

Regarding claim 30, Richardson discloses a method for displaying messages on a display of a personal communication device having paging functions, comprising the steps of:

storing in a memory of the personal communication device a contact database having a plurality of entries, each entry comprised of at least one telephone number and one name corresponding to at least one telephone number;

Art Unit: 2614

receiving data in a paging message, said receiving data including at least one a telephone number or name;

comparing said received data in the paging message with the contact database, to determine if the telephone number or name received in the paging message matches a telephone number or name in any of the contact database entries;

displaying contact database data on the display of the personal communication device that corresponds to the received data in the paging message; and

displaying on the display of the personal communication device a message prompting the user to enter additional data corresponding to the received data in the paging message, if the received data in the paging message does not match any telephone number or name in the contact database (see Figure 5).

Regarding claim 31, see Figure 5.

Regarding claim 32, see Figure 5.

Regarding claim 33, Richardson discloses a portable communication device comprising:

means for receiving a radio frequency paging signal;

means for extracting a paging message from the radio frequency paging signal, the paging message including a telephone number of the sending party;

means for storing a personal name directory comprising a plurality of entries, each entry comprising at least one telephone number and at least one message associated with said telephone number;

means for searching the personal name directory to determine a match between the telephone number in the received paging message and a telephone number in any of the entries of the personal name directory; and

displaying the message of the personal name directory entry corresponding to the telephone number in the received paging message, wherein the means for displaying further displays a message prompting a user to create an entry for the telephone number received in the paging message if the telephone number received in the paging message does not match a telephone number in the personal name directory (see Figure 5).

Regarding claim 34, see Figure 5.

Regarding claim 35, see Figure 4.

Regarding claim 36, see Figure 5.

Regarding claim 37, see Figure 4.

Art Unit: 2614

Regarding claim 38, Richardson discloses a selective call receiver comprising:

means for receiving a radio frequency paging signal;

means for extracting a paging message from the radio frequency paging signal, the paging message including a telephone number of the party who sent the paging message;

display means for displaying a message; the improvement comprising:

means for storing a personal name directory comprising a plurality of entries, each entry comprising at least one telephone number and at least one message associated with the at least one telephone number;

means for searching the personal name directory to determine a match between the telephone number in the received paging message and a telephone number in any of the entries of the personal name directory for displaying on the display means a message of the personal name directory entry corresponding to the telephone number in the received paging message or displaying a default message indicating that the telephone number in the received paging message is not in the personal name directory entries and further displaying a message

Art Unit: 2614

prompting a user to create an entry for the telephone number received in the paging message (see Figure 5).

Regarding claim 39, see Figure 4.

Regarding claim 40, see Figure 5.
